

Delock Wireless Charger 3 in 1 with 2 Charging Coils 5 W / 5 W / 15 W

Description

With this charging station by Delock a **smartphone**, a **smartwatch** from **Apple** and another device can be charged wirelessly at the same time. With the energy transfer by induction, charging cables are no longer needed and the connectors are protected. The charger supports fast **charging up to 15 watts** for suitably equipped smartphones.

Charging surface for headphones

The charging pad in the base of the station provides power up to 5 W and is suitable for devices that support lower reading inductive charging. For example, wireless headphone cases.

2 Coils

The special thing about **2 charging coils** is that smartphones such as the **Samsung Galaxy Z Flip** can also be charged when folded. This is because, unlike most smartphones, the charging coil of the Flip is located further down in the device. Furthermore, devices can be charged while lying horizontally on the stand, for example while watching a film.

Please Note

A PD 3.0 power supply is required to use all three charging surfaces at the same time.
