¹Based on read speed, unless otherwise stated. 1 MB/s = 1 million bytes per second. Based on internal testing; performance will vary depending on host device, usage conditions, drive capacity, and other factors.
²1GB = 1 billion bytes and 1 TB = 1 trillion bytes. Actual user capacity may be less, depending on operating environment.
³3 years or Max Endurance (TBW) limit, whichever occurs first. See support.wdc.com for regional specific warranty details.
⁴TBW (terabytes written) values calculated using JEDEC client workload (JESD219) and vary by product capacity.
⁵MTTF = Mean Time To Failure based on internal testing using Telcordia stress part testing (Telcordia SR-332, GB, 25°C). MTTF is based on a sample population and is estimated by statistical measurements and acceleration algorithms. MTTF does not predict an individual drive's reliability and does not constitute a warranty.
⁶Operational temperature is defined as temperature reported by the drive. Note that drive temperature readings are expected to be higher than ambient temperature when the SSD is placed inside a system. The SSD box package is rated up to 60°C.
⁷Non-operational storage temperature does not guarantee data retention.
⁸Physical product dimensions for length and width may vary by ± 0.10mm and product weight may vary by ± 10%.
⁹Download and installation required. Includes 5-year licenses for your compatible drive. Redeem within 90 days of purchase. May not be combined with other offers. Limited time offer; see Western Digital website for more details. Offer subject to change.
